General comments and recommendations for the future of our Committee: Committee or task force?	Our committee has always been very active, if not one of the most active committees at FIT. We have already started organizing the next forum which will take place in Lima, Peru in the fall. Forums provide a very nice opportunity for legal translators and interpreters to exchange views, share difficulties and sometimes bring solutions back home. We more or less all have the same kind of problems but it is always enriching to hear what is done in other countries. Besides, it is also a good opportunity to show that FIT is there to listen and provide assistance, to talk about the work done by FIT throughout the world. We have started to internationalize our committee with several members from Latin America and we plan to develop contacts with associations in Australia, Canada, Asia and Africa. We are also always quite attentive to new developments in the world of LITs and willing to provide our assistance whenever needed. An ad hoc task force could not provide the same kind of attention, advice and assistance as a permanent entity. The organization of forums is very time-consuming from the actual initialization of the project through the publication of the proceedings.

	We understand that future committees will no longer have access to any funding while task forces will. We therefore recommend that our Committee should become a permanent task force, thus giving it the opportunity to fully organize biannual forums and to keep on monitoring the situation of LITs throughout the world.
